SOFTWARE ENGINEERING TECHNOLOGY STUDENT — ARTIFICIAL INTELLIGENCE

PYTHON | SQL | WEB DEVELOPMENT | DATABASE DESIGN | LINUX/UNIX

PROFESSIONAL SUMMARY

- Motivated and detail-oriented student of Software Engineering Technology, specializing in Artificial Intelligence, entering third semester with a solid foundation in programming, web development, database design and Linux/Unix systems.
- Practical, project-based experience applying object-oriented programming concepts, relational database design and the Software Development Life Cycle (SDLC).
- Skilled in requirements gathering, technical documentation and analytical problem-solving, developed through coursework in Software Requirements Engineering and Discrete Mathematics.
- Strong communication and client service skills, built through experience in a fast-paced, high-volume food service environment; comfortable relaying information clearly to both technical and non-technical audiences.

TECHNICAL SKILLS

Programming Languages: Python, Java (OOP fundamentals), JavaScript, HTML/CSS

Web Development: Client-Side Web Development, DOM Manipulation, Responsive Design, UI Layout

Database: SQL, Relational Database Design, ER Diagrams, Data Modeling

Operating Systems: Unix/Linux (command-line & shell scripting, file systems/permissions), Windows

Software Engineering: SDLC, Software Requirements Engineering, Use Cases, Technical Documentation

Mathematics & Logic: Discrete Mathematics, Number Systems (Binary/Hex), Functions, Introductory Calculus, Algorithm Analysis

Professional Skills: Professional Writing & Reports, Presentations, Client Service, Time Management

EDUCATION

Software Engineering Technology – Artificial Intelligence (Co-op) Advanced Diploma **Sept. 2025 – Present**

Centennial College, Toronto, ON | Semester 3

Relevant Coursework (Semesters 1 & 2):

College Communications 1 | Programming 1 & 2 | Software Engineering Fundamentals | Web Interface Design | Functions and Number Systems | Introduction to Database Concepts | Client-Side Web Development | Software Requirements Engineering | Unix/Linux Operating Systems | Discrete Mathematics and Introductory Calculus

ACADEMIC PROJECTS

Movie Theater Website — HTML, CSS, JavaScript

- Designed and developed a responsive movie theater website, applying UI layout and front-end design principles from Web Interface Design coursework.
- Built interactive page features, such as movie/showtime listings, using JavaScript and DOM manipulation, with a layout optimized for both desktop and mobile browsing.

Relational Database Design Project — SQL

- Designed a relational database, including an ER diagram and normalized schema, applying data modeling concepts from Introduction to Database Concepts coursework.
- Wrote SQL queries to create, insert, retrieve and update records, ensuring data accuracy and integrity.

WORK EXPERIENCE

Team Member **Nov. 2025 – Sep.2026**

Tim Hortons, Toronto, ON

- Deliver fast, friendly and accurate customer service in a high-volume, fast-paced setting, including taking orders and processing transactions.
- Prepare food and beverage orders to company standards for dine-in, drive-thru and mobile app orders while following food safety and cleanliness protocols.
- Work closely with team members during peak periods to keep service times fast and maintain a positive customer experience.
